EVIDENCED BASED TREATMENT APPROACHES

Many of us can recall a time when we experienced a crisis and can remember thinking that it was fairly easy to acknowledge what we did wrong. Likewise, people who voluntarily seek or are required to seek mental health services usually have very little difficulty recognizing or identifying their failures and shortcomings. As professional helpers we will be more effective if we assume an evidenced-based approach to working with consumers. This workshop is designed to assist helping professionals develop and write evidenced-based treatment approaches that increase the likelihood of success for individuals we work with.

INSTRUCTOR: CHAMMIE AUSTIN, PH.D.

CHAMMIE AUSTIN received his Ph.D. in Counseling Psychology from the University of Kentucky and completed post-doctoral work at Saint Louis University. He is an Assistant Professor at Saint Louis University. Dr. Austin teaches undergraduate and/or graduate courses in Abnormal Psychology, Clinical and Counseling Psychology, Multicultural Psychology. In addition to teaching, he also regularly supervises doctoral-level clinicians. Dr. Austin has experience working with children, adolescents, and adults with wide ranging disorders and presenting problems.
